

I heard about the FSET Program through CCEP and enrolled in May 2019. When enrolling with FSET, my main goal was to find a full-time or part-time job in order to have a steady income. My long-term goal is to earn my CDL (Commercial Driver's License). While enrolled with FSET, I have created a solid resume, worked on interview skills, and have worked a few seasonal employment jobs to get me through while working towards my goals.

This past September, FSET and CCEP told me about the Joseph Project and recommended I complete the training for the second time. I completed the entire week-long training to help prepare for employment and was able to connect and interview with multiple employers. After completing the Joseph Project, I was interested in one participating employer- Gordon Aluminum. I talked w/ my FSET Case Manager, Danielle, about this job and the Career Services Specialist, Megan, was able to send a direct referral to this employer. I had an in-person interview and was officially hired and started my new job at Gordon Aluminum on 10/12/2020. The resume and interview help from my case manager, the CSS direct referral, and the Joseph Project together helped me get this job.

I am now working a full-time job with steady income which was always my goal. I look forward to my future with Gordon Aluminum while continuing to work towards my long term goal of earning a CDL.
